Words Have Weight – Choose Yours Wisely

One sentence can change someone's day. One careless remark can break a heart. One encouraging word can give someone the courage to try again.

In a world where communication happens instantly and words travel farther than ever before, the power of what we say—and how we say it—cannot be underestimated. Responsible communication is not merely about speaking well; it is about using our words with awareness, empathy, and purpose.

Words can inspire confidence, offer comfort, resolve misunderstandings, or motivate someone to do better. However, careless words can hurt feelings, create conflicts, and leave lasting scars. This makes responsible communication an important skill that we should practise every day. Good communication begins with simple habits. Think before you speak, listen without interrupting, and choose respectful words even when you disagree. Make eye contact when speaking, pay attention to the person in front of you, and ask questions when something is unclear instead of making assumptions. Saying please, thank you, sorry, and excuse me may seem small, but these words show consideration and respect. When emotions run high, taking a moment to pause before responding can prevent an argument from becoming a conflict.

In today's digital world, responsible communication is equally important online. Before forwarding a message, commenting, or posting, ask: Is it true? Is it kind? Is it necessary? Avoid sharing rumours or posting something that could embarrass or hurt another person. Remember that a message typed in seconds can have consequences long after it is sent.At school, our words can create a culture of kindness. We can encourage a struggling classmate, appreciate someone's effort, respectfully express a different opinion, and stand up against hurtful language.Every word is a choice, and every choice has an impact. Let us make our words a source of kindness, courage, and connection. Because when we understand that words have power, we also understand the responsibility that comes with using them.
